

Firefox Certificate Upgrade

A security certificate needs to be added to HBC/Firefox. Please follow these instructions before September 30th, or the HBC program will stop working properly.

1. Open HBC (firefox), click the + along the top bar to create a new tab.

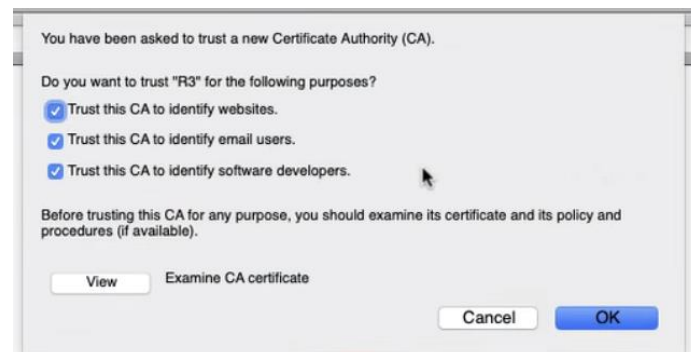

2. In the URL, Enter: hbc.mumms.com/R3.crt (then press enter)
Note: the R is case-sensitive

3. A dialog box will appear that asks, "You have been asked to trust...".

4. Check all three boxes.

5. Click OK.
